

Mini Kerbsider®

binlifts | sideloaders | weighing & ID | data solutions

> The Mini Kerbsider® range is the latest line in innovative recycling collection vehicle solutions from Terberg. Marking a focus by Terberg to develop a breed of mini-recycling vehicles to fill the gap below the full size recycling vehicle range.

The result is a refreshing range of vehicles that are purpose-built to perform the same duties of their bigger brothers but their size makes them ideal for collection schemes that require a more compact vehicle.

The Mini Kerbsider® range comes complete with the proven body design features of the larger Kerbsider® range but on a smaller scale.

- Low weight, high payload. Designed from the ground up to keep weight down
- Lightweight powered trough provides maximum weight savings
- Redesigned lifter roof provides structural strength and keeps weight to a minimum
- Simplified controls are surprisingly easy to operate and allow safe operation, each control station has the benefit of tried and trusted designs making it robust & reliable
- Licence headaches gone, the smallest vehicles in the range are built onto 7.5 tonne chassis meaning that finding drivers with the correct driving licence is less of a problem
- Bin clamp option allows the lifting and discharge of 240 litre wheeled bins
- Stillage body option gives a refreshing take and a safer alternative to traditional designs
- Optional handwash ensures that hands can be kept clean during collection duties
- Available with an optional rear mounted bag pod ideal for the stowage of used bin liners

- Emergency stop system meets EN418:1992 machinery safety
- Fully constrained lifter rollers give a safe & controlled lift
- Park brake monitoring & interlock prevents operation whilst driving
- External controls systems rated to IP67 submarine specification
- Vehicle height warning reduces risk of driving with lifter raised or tipped body
- Robust subframe mounted on chassis rails provides greater stability under tipping
- Controlled lifter cycle with slow stop/start reduces mechanical stress during operation
- Oil filtration to 25 microns on pressure *and* return line helps extend maintenance
- Burst hose protection ensures safety in the event of sudden hydraulic pressure loss
- Available with underbody weighing and vehicle tracking options
- Comprehensive training packages help increase safety and efficiency
- Extended warranties available

> The Mini Kerbsider[®] Stillage offers the benefits of stillage collection vehicle but eliminates the inherent dangers of 'traditional' stillage vehicles whereby operative are required to enter the back of a vehicle to fill stillages by hand.

Terberg's Mini Kerbsider[®] Stillage solution provides a less tiring and far safer method of collecting recycled fractions in removable stillages. The powered trough on the nearside is used to fill the stillages stored in the main body of the vehicle which are locked securely in place by a robust manual locking system. The stillages can then be removed later for emptying from the offside of the vehicle at the discharge facility.

Constructed from aluminium as standard, the stillage of the Mini Kerbsider[®] Stillage vehicle help attain the maximum payload possible.

KEY: ●-option ○-not available

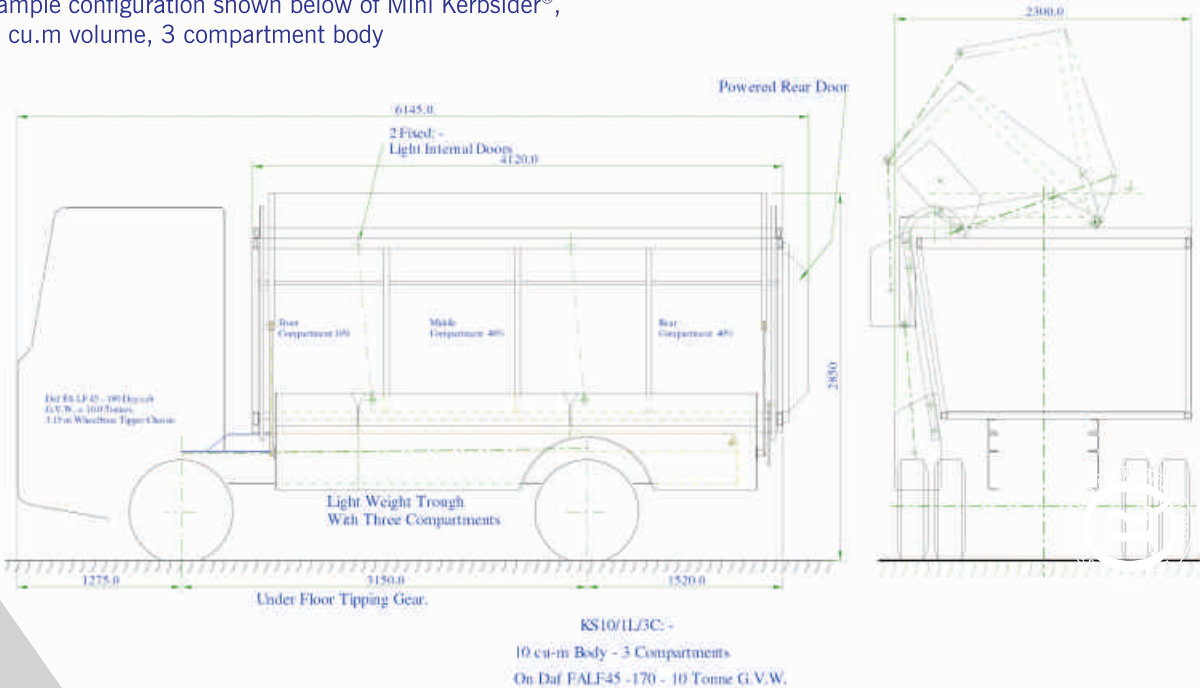

Other options available: caged body | handwash unit | rear mount bagpod | brush & shovel kit | customer livery including decals
extended warranties | full maintenance | retro fit of bodies to existing chassis | range of heights

*also available, the Mini Toploader® Stillage, please contact Terberg sales for details.

Mini Toploader® Stillage	16	Iveco Cargo ML75	4185	7.5	6605	2300	2000†	4 x 2	1 to 2	360L lifter	●	○	○
--------------------------	----	------------------	------	-----	------	------	-------	-------	--------	-------------	---	---	---

estimated payload figure for Mini Kerbsider® and Mini Kerbsider® Caged assumes 1 body compartment
 estimated payload figure for Mini Kerbsider® Stillage quoted assumes 5 equal volume stillages of aluminium construction
 estimated payload figure quoted for Mini Toploader® Stillage assumes 2 equal volume stillage of steel cage construction
 The specification tables above are not exhaustive, other makes of chassis and configurations are available. The tables are intended to give an indication based on the most commonly specified configurations.

Example configuration shown below of Mini Kerbsider®,
 10 cu.m volume, 3 compartment body
